--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

This is the first Office Action corresponding to the original filing.

Drawings

The drawings are objected to because of the reasons set forth in Draftsperson's attached PTO-948. Correction is required.

Reissue Applications

This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

(a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

This reissue application was filed without the required offer to surrender the original patent or, if the original is lost or inaccessible, an affidavit or declaration to that effect. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Robak et al. (Pat. No. D340,235).

The patent to Robak et al. shows a display system comprising a pair of displays, arm assembly for supporting the displays, support means for supporting the arm assembly and mounting means for mounting the displays to the arm assembly, the mounting means adjusting the angular orientation of each of the displays relative to the arm assembly. Please refer to the attachment for the illustration of the elements .

Allowable Subject Matter

Patent claims 1-15 are allowed over the art of record.

Conclusion

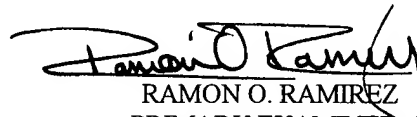

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woodshall and Bertolasi show devices of interest.
